Why Metaverse or Virtual Reality

Soland City strongly believes that VR and Metaverse will be the future of Internet browsing, working, online shopping, meeting, and socializing. VR and Metaverse can make working more fun, practical, and profitable in the long run. Your business has an opportunity to thrive, think twice.

INC estimated that in 2030 majority of businesses will have a V.R. Office. We work hard to bring communities the best possible engagement tools.

Easily accessible multi-device Virtual Reality Offices and Community Lounges

Desktop

Laptop

Mobile & Tablet

VR / AR & AI

Overview

4D Markets is an innovative company homing innovative personnel and products. Our company is passionate and specialized in the blockchain industry. Our team has substantial experience in business management, finance, computer technologies, and coding, currently concentrating on VR and Metaverse.

Our main development effort is on the Soland City and the virtual reality office offering and development of the environment. During the global pandemic from the beginning of 2020, businesses, schools, public services, and many more went remote in many countries. Work made remotely has happened through different VoIP apps.

We saw that moving from the traditional VoIP calls into an environment where the team members and customers can enter is way cooler than just video conferencing with heads. Businesses can present their products and services and sign client agreements inside the virtual office.

We can guarantee that this experience makes working more fun and is something no business wants to miss. The purpose of a virtual reality office can be different: mainly used as a working space within a company or a project, e.g., for developers and designers from other locations. It can be a management meeting space for team members from various sites. It can be set up as a real estate sales office with virtual tours by default. We have probably not been able to think of all possible use for the virtual office. That said, collaboration with potential customers is highly appreciated.

Value proposition

Manage time better with your team & be more effective with clients.
Save time, reduce travel expenses and use your time to sell more.

Maximize your community engagement- with a fun Meta-Lounge.

Vision and mission

A vision of VR where important business elements are in one place.
The mission is to build your business an easily accessible VR Office.

Virtual Reality Offices

Introducing
VR-Offices

VR-Offices is the future?

It is the most effective form of engagement and combined advantages the internet can offer. We strongly believe that many online activities will most likely be viewed by using VR technology in the future. Considering the carbon footprint, we firmly believe VR can reduce this much instead of multiple people traveling to conduct a monthly meeting. They will be able to enter this VR Office right from their location as if all of you were in the exact physical area and the same meeting room or office.

Working in VR is not just way more fun, but it allows people to manage their time, shorten the unnecessary steps, and get to the point directly. Ultimately affects your business profitability.

We are most likely able to make your whole working environment in VR, depending on your customers and how many different layers your organization has. We can build several rooms and meeting points to your office, not only one ample space to roam in. Square meters in VR are limitless and cheap.

Reduce your carbon footprint

Avoid unnecessary traveling to reduce carbon footprint.

Soland VR Offices - closed environment

VR combines business tools into one place. VR stands for Virtual Reality, and in Soland City, we bring modern advantages to the world.

Businesses can use the Soland VR Offices for company meeting rooms, support team spaces, client meeting rooms, showrooms, events, and co-working spaces.

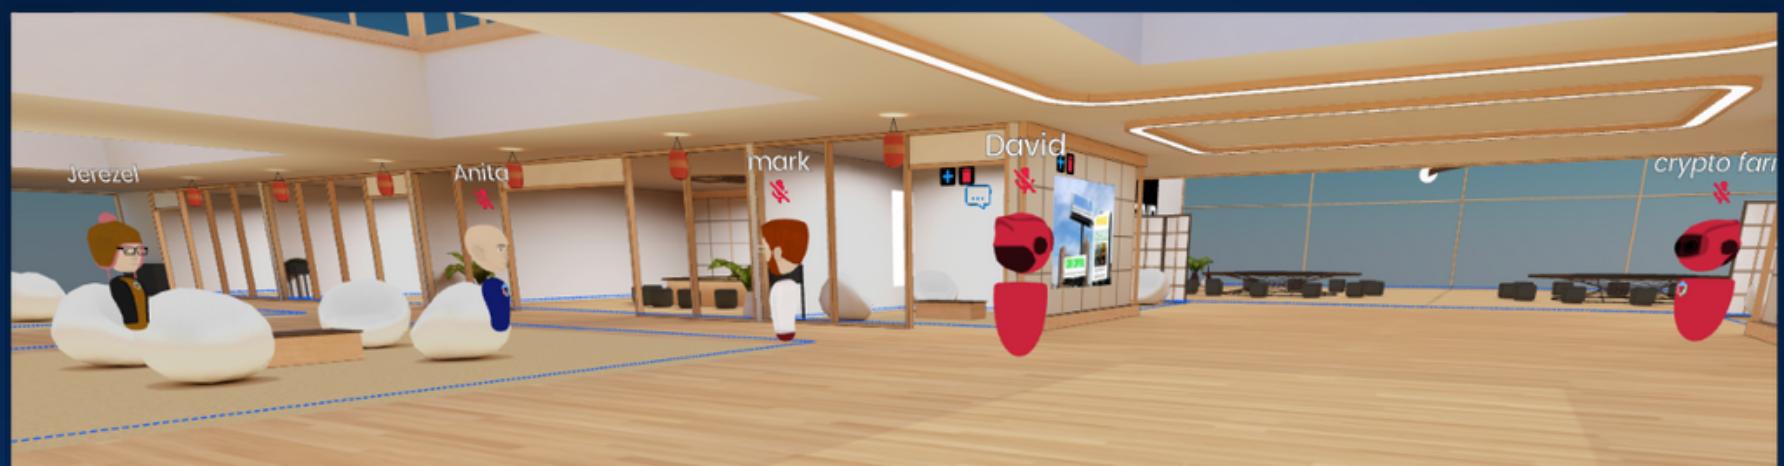

These future elements will be highly beneficial for your business and will be extremely fun.

Work in VR Office is the future

Get your team together regardless of where their physical location is. Meet with clients in your VR Office and cut the time spent on the early process - VR Office will make your business more efficient and productive.

A Virtual office will save money and time; it allows you to meet more clients, potentially make more sales, and be more profitable in the long run, thanks to our service.

Plan, meet, share, chat, video & audio call, browse the internet on a wall, make polling, and so much more.

" This will surely benefit my business in many perspectives I need this "

- Damiana#1732

" This office is incredible! I am so excited to work in this VR Office! It is amazing! "

- Fanboi | Soland City#0020

" I will buy one, so I can show off and meet with my friends to stream."

- Mc Connell#6870

Modern work

Upgrade your local or international team meeting room into a fun and eco-friendly VR Office. Increase teamwork potential, we have been using VoIP services for 2+ decades, seeing the heads or initials of the other persons in the call.

Let's take ourselves into 2022 and meet in a meeting room where everybody enters as their 3D or realistic human avatars. Gather around a meeting room table or join the project "command room" project to cooperate with your colleagues and team members.

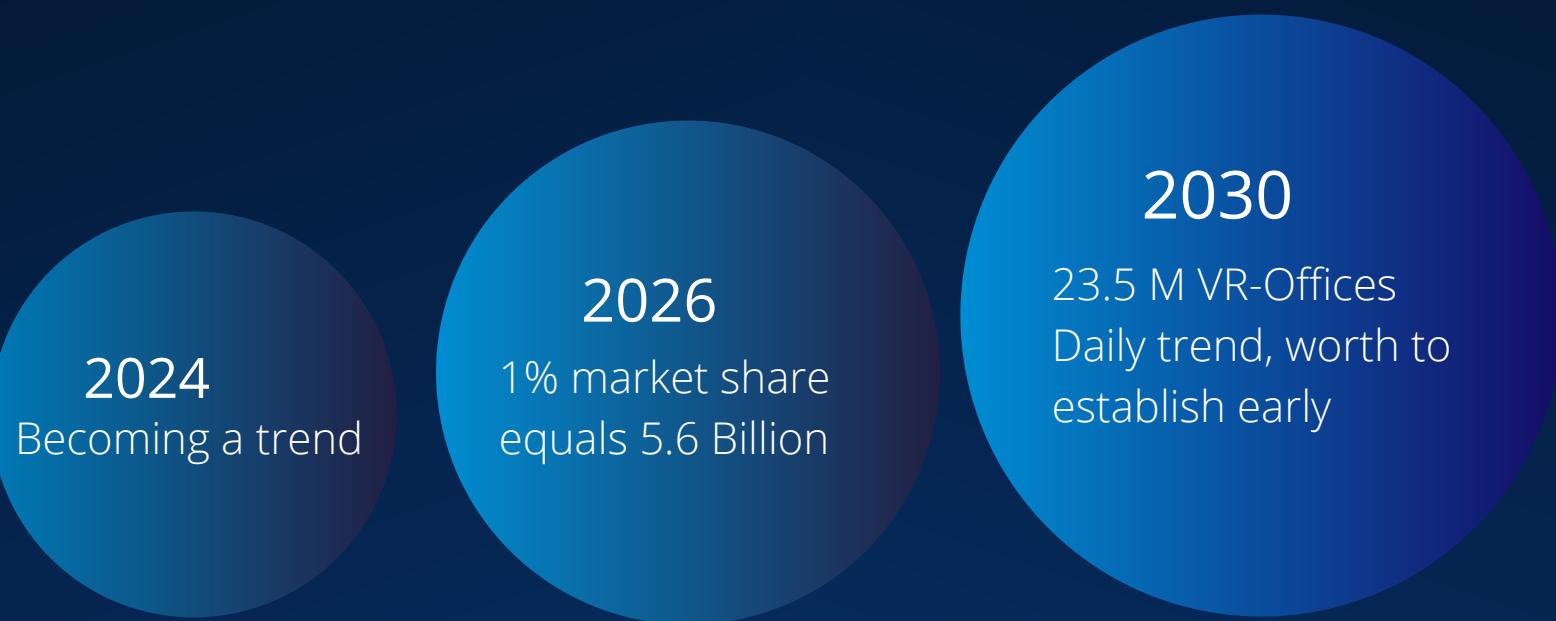

Let us take advantage of the technology that existed for a long time and improve performance and co-operation for your business. Know that you all can be the tomorrow!

Most potential improvements

1. Opportunity to sell more
2. Manage time better
3. Pay less expenses
4. Global VR reach
5. Be eco friendly
6. Growing trend
7. Adds credibility
8. Meet clients in VR
9. Co-working at its best
10. Better social interaction

Market size & growth potential

Key factors

Estimated that the majority of the businesses will have VR Offices by 2030

The value of virtual reality should reach 560 billion dollars by 2026.

Metaverse

Introducing
Soland City

Welcome to Soland City - Introduction

Welcome to Soland City, the lively financial hub of Solana Blockchain.

Soland City is a virtual city with a modern and secure decentralized finance infrastructure. Our Metaverse and VR development is our version of Defi & NFT, where anyone can earn passive income or perhaps exchange their earned tokens virtually in a place that reminds them of a Wall Street kind of Exchange.

We've planned some seriously potential VR and Metaverse experiences for Crypto, NFT, Defi, and Trading communities to open their Community Lounges in Soland City.

More importantly, we serve businesses with VR Offices that can be custom-made to meet almost any requirements of a VR Office. Soland makes it possible for you to get your business a VR Office, while our main aim is to build a hybrid metaverse to onboard more enterprises into the blockchain.

Metaverse - open for everyone

Meet the Community that is building DeFi and NFT activities in the Soland City Metaverse!

Soland City can be visited by anyone and especially by those who are willing to earn passive income in VR with Crypto Currencies and NFT's. There is so much that will change thank to the advanced technologies of today. Soland City has a very ambitious vision of expanding DeFi and NFT activites that can be performed in Soland City metaverse. Solana's Financial District is a Virtual Reality space and it offers by passive income streams while creating interactive options for other communities

In a decentralized metaverse, the platform is built on open-source software and governed by community members (users), who have the freedom to design the platform collaboratively and make decisions about the future direction it might take.

Built with the best

**POWERED
BY SOLANA**

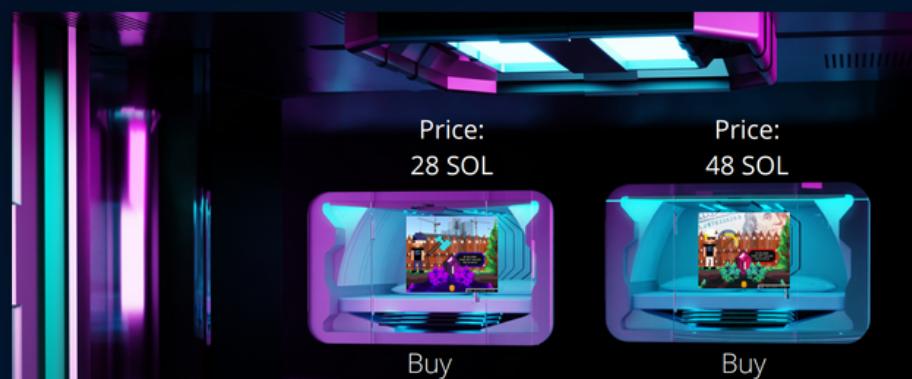

5

Soland City Towers

Soland City is building Towers and Buildings for Defi and NFT activities. We have added more floors so other projects can join the Soland City meta-economy activities in VR.

Soland City will give every community and project a base in the Soland City towers, where the community can meet, work and grow together. When projects or artists, for example, creates staking for their collection, we will further offer the VR staking option in the Soland City Metaverse. Like this, new floors are added to the tower, aiming to build the world's tallest multi-chain Defi and NFT towers.

Soland City's cryptocurrency exchange facility will remind us of the Wall Street stock exchange.

Build a lounge for your community

Get a lounge for your community! Soland City will build your community a lounge or co-working place which can have a free accessible lobby and members-only area. We welcome freelancers, SMEs, or big corporates to benefit from virtual reality. Regardless of your community agenda, in Soland City, we will build your community a lounge that is beneficial and makes engagement fun.

As said, we believe VR and Metaverse will, in a few years, be how we browse the internet or at least work hard to do that. Our clients will get massive benefits from VR Offices. We know this is the future, and this is something that investors, businesses, clients, events, and so many more do with the help of VR and Metaverse.

Create a free access lobby with members-only area

Create a lobby as free access, and place your offers, information, and other cool stuff. You can also create a members-only area where you can engage better.

Partnership direction

During June and July 2022, we conducted some pre-marketing for companies in Marbella, Spain, to see their interest in VR Offices.

We quickly realized the demand for these is high, and companies started to offer us co-operation support.

Businesses

We are currently targeting corporations, luxury brands, art galleries, and real estate companies. The next target group might be any thinkable businesses: cars, jewelry, raw materials, who knows?

Crypto / NFT communities

We are here to build your Crypto / NFT-related web3 community lounge. Let's custom make your Project Community, Dapp, Crypto Exchange, NFT Marketplace, A news site, Launchpad, Investor & Trading groups, and many more. Contact us to define the best possible VR or meta solution for your beloved community. They want this!

Meet with the team, and inform the community in the most engaging ways. Make your community quality to the highest level and make it stand out!

Venture capital investors

A needed partner to be qualified for the requirements that we must meet to be qualified for other top listings.

Crypto and NFT investors

Building Crypto trading groups lounges to engage with other members

Soland City Roadmap

Phase 1

- Easy access web browser VR / Metaverse
- VR NFT Marketplace, Staking & Lending
- High VR quality & Unreal 5 engine
- Top physics & gaming engine
- Sunny and lovely weather mood
- Digital Billboard NFT Banner Ads
- VR Office pre-order delivery
- VR community lounges
- VR NFT Hub
- Beta user register / clients KYC
- Update Whitepaper & website

1 Q4 2022

Q1 2023 2

Phase 2

- VR DEX and Farming
- Soland NFT members only area
- Feature & function upgrade
- Expand land and buildings area
- Creator & artist economy
- Developer economy
- VR Office for Soland co-working
- Build your personal avatar
- More VR Offices and lounges
- VR Community lounges
- Launch multi-chain program

3 Q2 2023

Phase 3

- VR Baking and Voting
- Buy VR Offices with SOLD
- User friendly improvements
- Land expansion
- Full VR Glass experience
- More VR Offices and lounges
- Update Roadmap
- Public event area
- Multi-chain Metaverse
- NFT building sale
- Update Whitepaper

Q3 2023 4

Phase 4

- VR DeFi Hub
- More VR Offices
- Partners Trading DAO
- LaunchPad lounge
- Crypto News lounge
- VR Community lounges
- Community voting developments
- AR and AI testing
- NFT floor sale
- NFT land sale
- In TOP 10 Metaverses

Metanomics

Introducing
\$SOLD

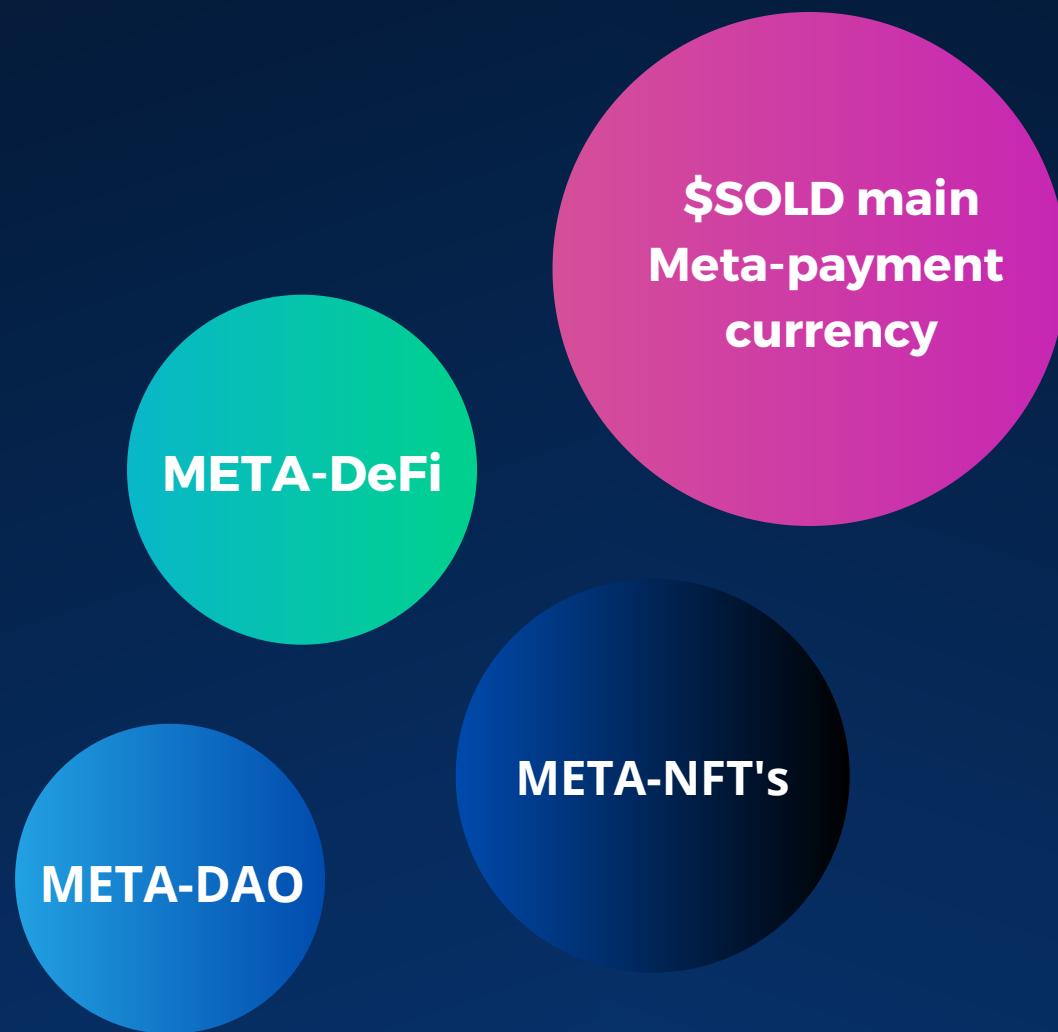

\$SOLD - Introduction

We are building the most interconnected Defi and NFT "meta-economy," which is supercharged by our meta-payment currency \$SOLD. Maximum benefits and reward system for holders from Solana's Financial District called Soland City Metaverse.

\$SOLD is Soland's main payment currency in Metaverse, while it offers an SPL governance token for Soland City Metaverse. \$SOLD holders can claim rewards if they stake their fungible & non-fungible tokens into the Soland City Community Treasury.

\$SOLD will be used for in-app purchases in all services offerings while enjoying discounted prices and zero fees. Soland City a well planned and is begin well executed. Soland City is becoming a DAO (decentralized autonomous organization), and owners of the Metaverse will enjoy a wide range of benefits.

Soland City NFT Collection (\$SLC) holders will have governance rights with x2 voting power.

\$SOLD - Overview

Our goal with \$SOLD is to build one of the strongest Metaverse NFT and Defi economies while making multiple passive income streams in Metaverse actual and possible. Enjoy unreal advantages in the form of discounts or no fees at all.

The meta-economics described in the graph below has three main goals:

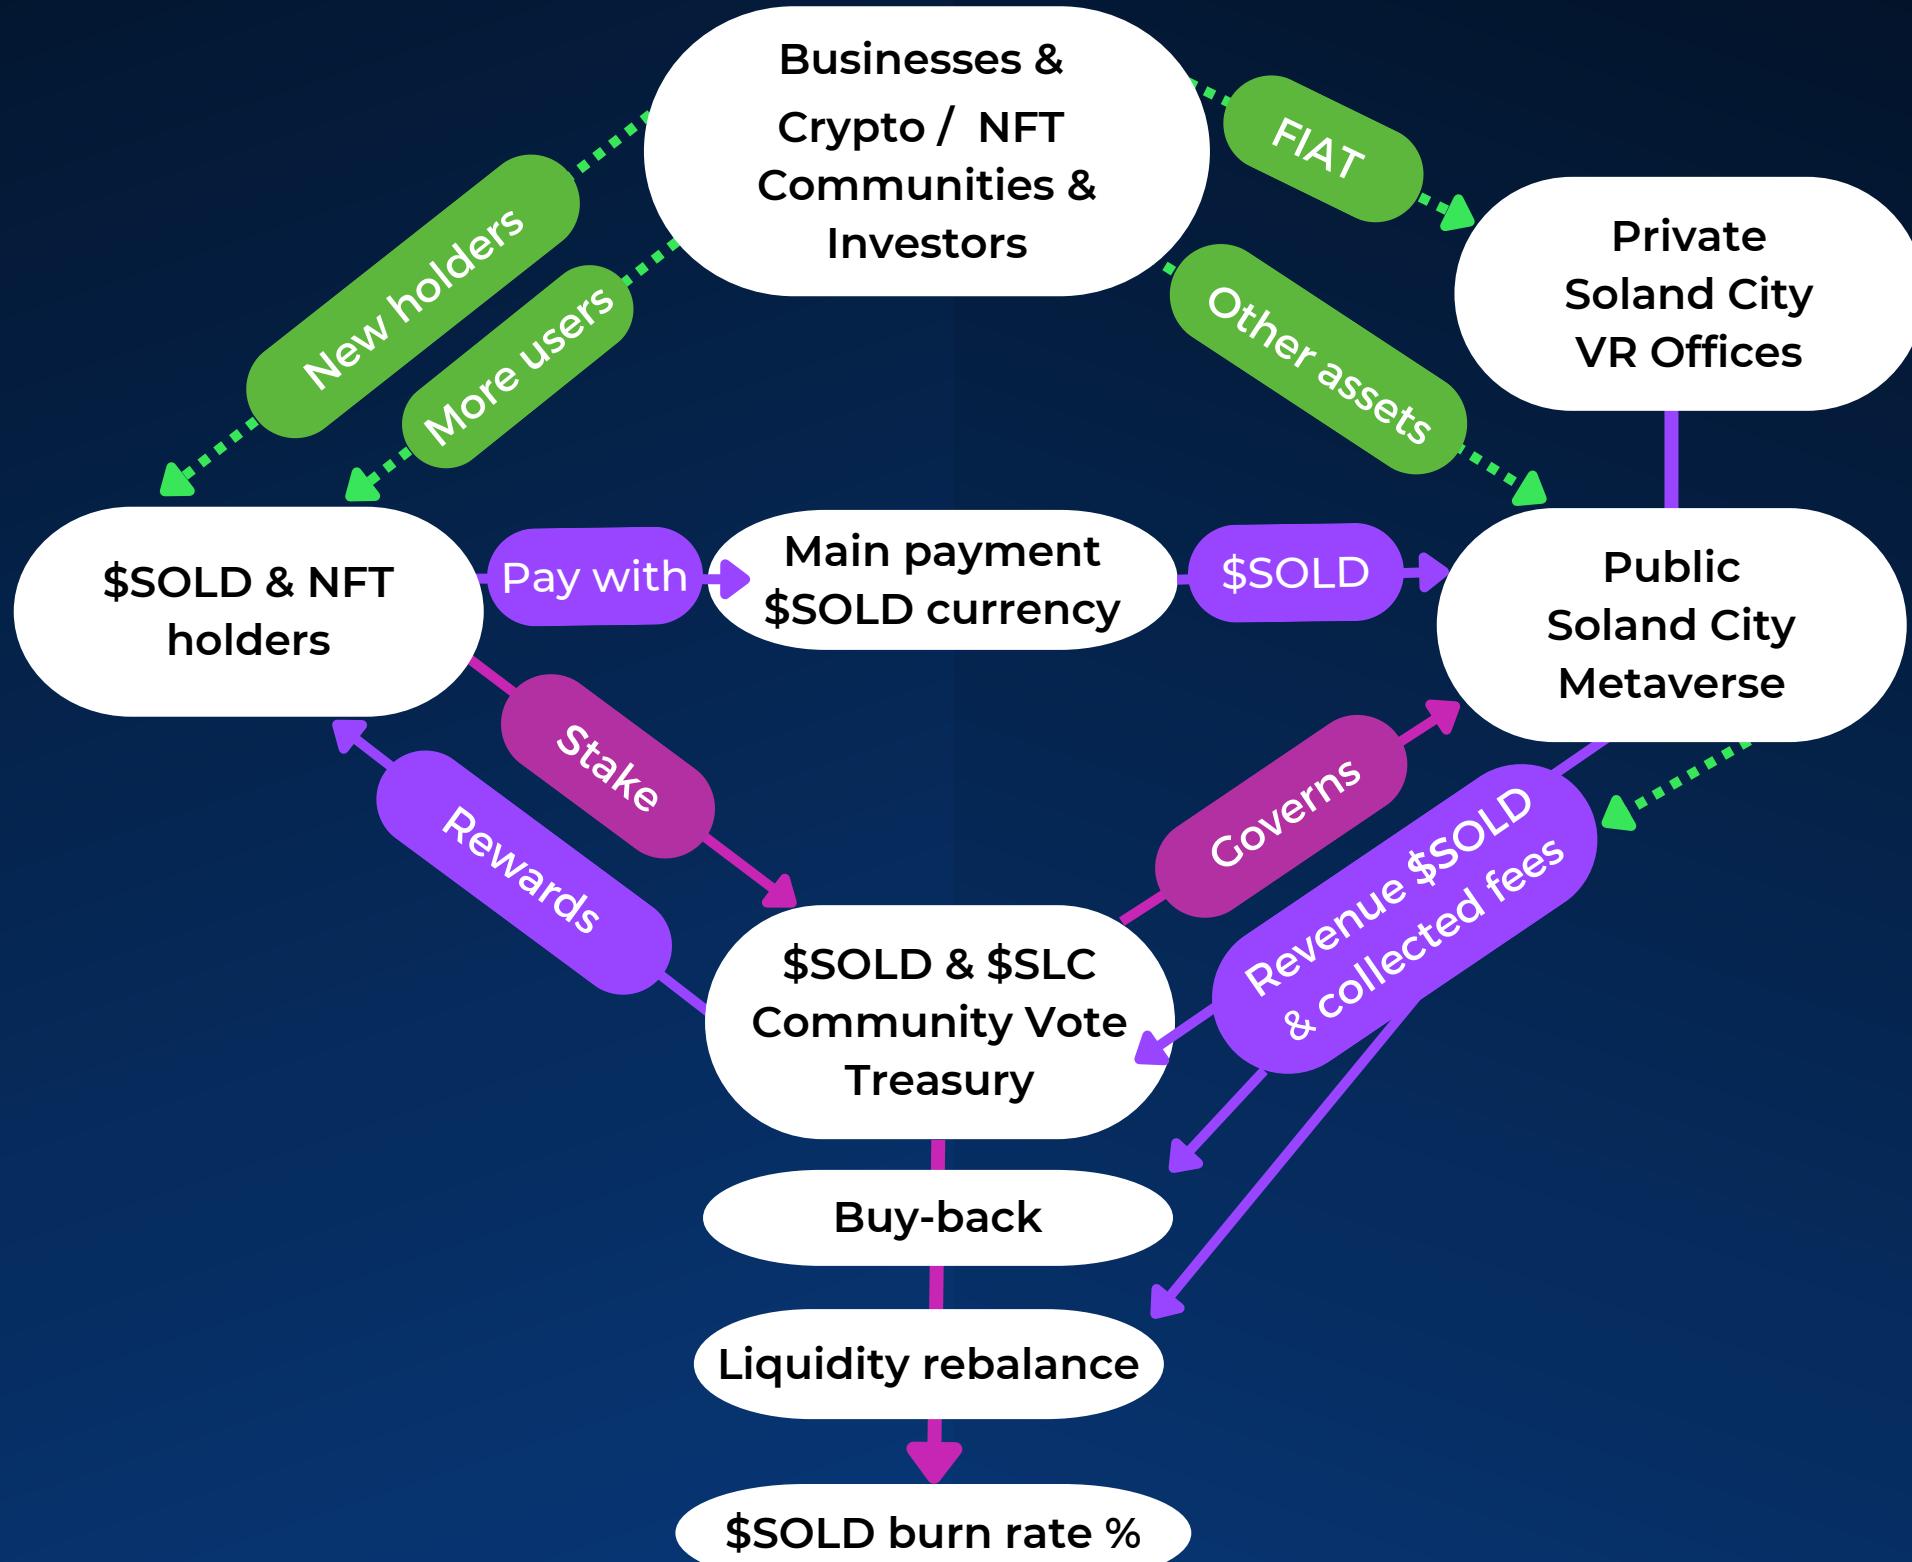

- 1) Create multiple passive income streams for \$SOLD and \$SLC holders from the fees our meta-economy creates
- 2) Reward the community for interacting with Soland City Metaverse. Holding a part of Soland City Token or NFT will grant holders unfair advantages
- 3) Interconnected and decentralize the governance of the Soland City meta-economy in a way that it helps the tokens and collection to perform

\$SOLD - Meta-Economy

The meta-economy described in the graph below has five main goals:

- 1) Holders vote for the development direction and community treasury: Buy-back, liquidity rebalancing, and \$SOLD burn rate
- 2) Governance and community treasury create multiple passive income streams
- 3) Increasing the demand for \$SOLD as the main payment currency & hefty advantages
- 4) More partners, new holders, and more use for \$SOLD
- 5) Other assets and FIAT revenue allow Soland City and holders strategical growth

\$SOLD - Key utilities

Governance rights

Holders of \$SOLD or \$SLC NFT can vote for the future development direction of Soland City metaverse

Referral and earning system

Invite people to Soland City with your referral link and earn from their purchases. Potentially earn passive income on top of the referral earnings

Passive income streams

Multiple and economically strong passive income straight to your wallet, earn \$SOLD 24/7

In meta-payment currency

Pay with \$SOLD for goods and services and enjoy discounted prices and zero fees

\$SOLD
DeFi / NFT metaverse
web3 x web2
VR-Offices

Communities and businesses

We will build Crypto and NFT communities; lounges were to meet with the tea, or to hang out with other holders.

Soland VR Offices offers businesses to get the maximum digital potential with an extensive range of valuable advantages.

\$SOLD - Token distribution

DINT - SOLD token swap

18.081.235 SOLD reserved for the purpose of converting from our eth project to the new Solana chain, Soland City \$SOLD

Liquidity and liquidity pool

Total of 79.118.765 SOLD of supply
 - Exchange liquidity for CEX
 - 60M in Liquidity pool & DEX
(initial liquidity locked for 3 years)

Contributors

Reserved for dedicated and full-time contributors
 - 50% locked for 1,5 years (relock part)
 - 50% locked for 3 years (relock part)

Rewards

16.800.000 for 5 years
 60% paid out in 2,5 years
 40% locked for 3 years

Rewards breakdown below

Soland City NFT Collection

2.400.000 SOLD of supply (hidden in collection)

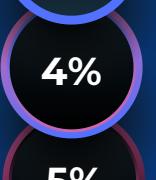

Lending

1.200.000 SOLD of supply

Staking

2.400.000 SOLD of supply

Farming

4.800.000 SOLD of supply

Baking

6.000.000 SOLD of supply

Non-fungible-nomics

Max supply.....	8000
Mint price.....	0.8 SOL
Fair distribution.....	All will be sold
\$SOLD Liquidity.....	40% of total sale
Voting power.....	x2
(buy back).....	12

NFT collection

The Soland NFT collection is a small representation of your involvement in a vibrant city that will change how we view virtual opportunities. Our lives are about to take a turn, unlike anything we have experienced before as a species. The Metaverse, Defi services, NFTs, and the entire cryptocurrency/blockchain structure have many technical and intricate aspects. The complexity of those topics is enough to write dozens of books, but the idea behind our collection is to help anyone become a community member by simply understanding the core of the NFT world and how the Metaverse will be implemented into our daily lives.

Soland City covers the endlessly complex aspects of the Metaverse and all the tools you need to become an active and productive community member. The collection serves as an entry point to a community that will help you learn the basic ropes in a way that is seamless and easy to grasp. There is no need to feel overwhelmed by the phenomenon that is on the verge of happening. This NFT collection is your passport to the new era. Once that helps you transition, take full advantage of decentralized finance opportunities with limitless potential.

Let Soland give you that initial push that will provide the building blocks to a whole new way of life. We are a community that seeks to create a permanent bond with all members as we help them develop the skills to thrive and prosper within the realm of the Metaverse.

Access the members-only area

Hold a minimum of one (1) Soland City NFT and access the members-only areas underground and pent houses of each Soland City Defi / NFT tower.

Also, get governance rights to the Soland City NFT's future activities.

NFT Story

There is no denying that we are now living in a world completely changed by restrictions on global borders. The entire planet is moving towards a new way of life, but it limits how we can conduct business.

Many aspects of society as we know it today are crumbling right before our eyes. We are heading into a severe change, and most of the world is aware of the transition. It may seem like this is a time for distress, but instead, it is a time that brings very positive changes into our lives. When digital communication is so seamless, we seem unable to take full advantage of it, but that is all about to change. We are soon to be involved in what is the most remarkable and most relevant change we have seen so far.

We are heading into the Metaverse. It is a new alternate reality that we can control without fear of restrictions in the process of development and financial growth. This world is an entirely new and inspiring place to be, and Soland is the ultimate virtual financial community to help you make this critical transition.

Make no mistake; we will live in this world just as much as in the traditional world. It is not ideal to say “real” and “virtual”. The truth is that the digital world we experience in the Metaverse will be just as accurate as the one you share online. You will be living in a city that is full of life, within a metaverse that is highly engaging and full of options that give us a vast number of opportunities that seem so out of reach today. Humanity has yet to witness the tremendous changes that are coming, and Soland City wants to offer the perfect community that will be there for each other during this essential transition.

NFT Utility

When we started Soland City, the idea was to create a robust community that would grow together and creates a strong presence in the vastness of the Metaverse. Your NFT value can skyrocket without limitations and is one of the most exciting aspects of this journey.

With that said, the actual value of your Soland NFT collection acquisition comes from community support. Not only that but also in the feeling that you are part of something bigger and something that allows you to make this rough transition much easier to handle.

Thanks to the power of community, we have been able to move forward and evolve as a species. Strength has always been in numbers, which is all the more relevant and trustworthy as we move toward a massively new and promising future.

The power of community gives the highest value to our collection. It goes beyond the value of the NFT itself and turns into a passport that makes you a member of an exclusive community and an active citizen of the Metaverse. There was a time when this all seemed like science fiction, but the Metaverse is accurate, and we are going to merge the offline world with the online world in incredibly creative and efficient ways. The global Soland will give you the power to evolve within the Metaverse and create business opportunities with a more extended and reliable reach.

Dapps

Soland City is building a synergy of useful Token and NFT apps, as a new Defi experience and further develop into interactive VR versions of the following Dapps:

Roadmap

	Soland Token	NFT Collection	Dapp's
2022 Q3	To be launched	Launched

2023 Q1	CEX Listing Launch Farming Marketing Launch Voting Launch Lending CEX Listing	Marketing NFT Showroom NFT Farming Marketing List in top marketplaces	NFT Farming Token Voting Community Voting Developments
2023 Q2	Launch Token Baking Combo Baking	Launch NFT Baking Combo Baking	Baking Baking V2

The Company

Introducing

4D Markets

The Company

4D Markets OU

Since 2019 based in Estonia, Tallin.

Under License Number: 14821048

Contact person: Jan Peter Viherpuro
Position: Co-founder & developer
By email: contact@4dmarkets.com
By phone: +34 61 03 444 03

Core Team

The team behind 4D Markets and Soland City is already a community of people driven by the Metaverse's exciting opportunities. We seek to grow and prosper in this new world and want you to become part of that process.

The journey will be something that requires the strength of a solid community that creates new opportunities for financial growth within a wholly new and limitless environment. There is a world of complexity behind NFTs and the Metaverse. Still, our goal is to make this process seamless and to help you make this transition into the latest stage of the digital age.

No need for technical knowledge or complex explanations; you can learn the essentials and still become a productive and treasured member of our community. Love is why Soland City is the best place you want to be when you make your way into the Metaverse.

Jan Peter Viherpuro
Co-founder & developer

Jan Peter is on a mission regarding VR Offices and how businesses will benefit from them, making business more effective and profitable.

Passionate and dedicated to Soland City Meta-economy and VR Defi opportunities.

Isaac Omonije
Full-stack developer

Isaac is, by experience and knowledge, an expert at the front and backend.

Professional in blockchain development, specialized in NFTs and Dapps. He is currently working on Soland DeFi Metaverse and VR Offices.

Anders Johnsson
Tech Advisor

Anders has business experience and is a very experienced advisor in blockchain, NFT, Defi, and Metaverse.

Ander's strong knowledge and experience make him a veteran in the blockchain.
